

Don't be held back in your airline capacity analysis...

capstats.com is an online product of

What is the best way of analysing worldwide airline capacity data?

capstats.com is the easiest way of viewing, analysing and downloading global airline capacity and flight frequency data. Using Innovata SRS schedule files, all data has come direct from the airlines themselves.

The product is straightforward to use, so you can start analysing important data rapidly. Primary output includes seat capacity, departures, ASKs and CO₂*. All this can be analysed by region from airport to continent-level, and by date from 2002 to 6 months in advance.

The key features of the capstats.com systems are:

- Reliable data direct from Innovata SRS filed by airlines
- Historic figures back to 2002 for Europe (2006 rest of world) and then 6 month advance data
- Various filters allow you to easily dissect the information
- Quick start and query system
- Excel exports
- Tabular and graphical output (time-series and comparison)
- Show or hide stopping flights
- ASK and CO₂*

*Coming soon

“ We use capstats.com to monitor the activity of our main competitors, assess new airport bases and to maintain general market awareness. **Ryanair** ”

See what you want: filter the colourful tables and charts in an instant by origin and destination information, carrier, and equipment

“ We find the site very useful in evaluating the stock of seats and also the changes each year to check momentum drivers for the airlines we track. The site is a useful ready reckoner when we need geographical or airport trends for airlines under our coverage. **Goodbody Stockbrokers** ”

Track changes: comparing like for like across various factors is simple with time-series and comparison graphs

capstats.com can help you to:

- 1 **Be competitive:** the huge amount of data allows for detailed market analysis so you can understand the performance of competitors as well as yourself
- 2 **Save time:** new queries can be run, or past ones can be accessed, as soon as you have logged in - saving you extra time in the system as well as from not looking elsewhere
- 3 **Improve presentation:** demonstrate trends and comparison professionally with impressive graphical output options
- 4 **Be insightful:** Excel exports mean that you can perform even more detailed analysis of the data for extra insight
- 5 **Increase environmental awareness:** know the environmental impact in the market with CO₂ output figures by seat, kilometre and flight total and use this to improve efficiency
