Stay ahead of your competitors...

Expert software & advisory services from

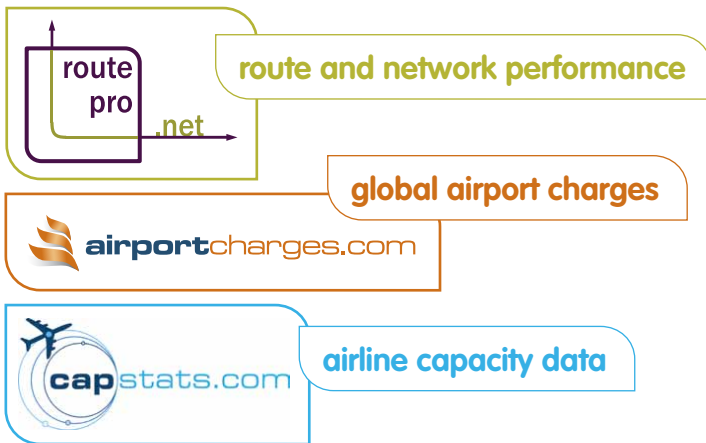

**rdcaviation**

At RDC Aviation, we provide airports and other major aviation businesses quick and efficient access to the most advanced information and analysis in the industry. We do this through a unique mix of expert advisory services and unrivalled software systems.

Our offering is made up of four core services and products:

## Software & Data

## Advisory

Our clients come back to us time and again for our quality, class-leading solutions in the areas of:

- > new and existing route performance
- > network profitability analysis
- > long-term traffic forecasting
- > emissions modelling and reporting, and ETS support
- > intuitive airline capacity analysis
- > rapid access to airport charges
- > monthly updates on key aspects of the industry
- > independent research and advice

“ We have found RDC Aviation to be an invaluable resource in our emissions market analysis. We surveyed the market and found their access to databases to be the best in the business....  
**PointCarbon** ”

“ RDC Aviation is a smart company whose easy-going philosophy, alongside their highly professional skills, results in a range of users' friendly products adding high value to business studies.  
**Lyon Airport** ”

## At RDC Aviation, we'll help you:

- 1 Be independent:** hear what you need to hear from our consultants, not what someone wants you to hear - or make your own judgements based on our software results
- 2 Be leaders:** quality, trusted analysis will help to provide a solid foundation on which to move your business forward
- 3 Be confident:** with more than 150 clients in over 30 countries, we have a built up a solid reputation so you can be confident of letting us handle your analysis
- 4 Be flexible:** combine advisory and software for the solution which best fits your time, budget and presentational constraints
- 5 Be efficient:** save money with our flexible approach to business and competitive rates
